PROFILE

As a Machine Learning and Deep Learning Engineer, I specialize in tackling complex challenges using AI. With a strong educational background in Computer Science and Artificial Intelligence, I possess the skills to develop, implement, and optimize machine learning models effectively. I have a profound familiarity with frameworks such as TensorFlow and Keras and am driven by a passion for utilizing AI to drive innovation and enhance decision-making processes. My collaborative approach and ability to work seamlessly within diverse teams consistently contribute to successful project outcomes.

EDUCATION

Bachelor of Computer Science and Artificial Intelligence

09/2020 – 07/2024

Benha University, Department of Artificial Intelligence

GPA: 3.76 out of 4

AI/ML Training

08/2023 – 10/2023

ITI (Information Technology Institute)

Menoufia, Egypt

PROFESSIONAL EXPERIENCE

Machine Learning and Deep Learning Engineer Intern

08/2023 – 12/2023

Electropi 🌐

Cairo, Egypt

- Developed various machine learning and deep learning projects including:
- Customer Segmentation for E-commerce Personalization: Developed segmentation models.
- Custom Machine Learning Library (PyCaret): Built to automate ML workflows.
- Airbnb Listing EDA: Conducted exploratory data analysis.
- NLP Twitter Disaster Classifier: Created classifier for disaster-related tweets.
- Sentiment Analysis on Social Media: Developed LSTM-based models.
- Medical Image Analysis: Implemented CNNs for medical classification.
- Market Segmentation: Applied neural networks for segmentation.

Data Science intern

08/2023 – 10/2023

TechnoHacks EduTech 🌐

Nashik, India

- Developed various data science projects including:
- Email Spam Filtering: Developed models to filter spam emails.
- Social Media Sentiment Analysis: Analyzed social media posts to determine sentiment.
- Employee Turnover Prediction: Created predictive models for employee turnover.

SKILLS

Programming Languages:

- Python, C++, Java

Tools and Frameworks:

- TensorFlow, Keras, Scikit-learn, NLTK, spaCy, OpenCV, Pandas, NumPy

Data Visualization:

- Matplotlib, Seaborn, Plotly

Database Management:

- SQL (Relational Databases)

Soft Skills:

Communication, Problem-Solving, Teamwork, Time Management

PROJECTS

Alzheimer’s Detection With Generative AI

Graduation Project

- Developed a deep learning model for classifying MRI images to detect Alzheimer’s disease. Implemented Transformers models to build a chatbot aimed at reducing patient stress and aiding memory retention.

Bone Fracture Classification using MobileViT Transformer

- Implemented MobileViT Transformer model for classifying bone fractures based on medical imaging data.

ASL (American Sign Language) Detection using Cycle GAN and Deep Learning

- Developed a Cycle GAN model to generate ASL images and applied a deep learning model for real-time ASL detection.

Heart Disease Detection

- Implemented multiple models and applied different preprocessing techniques to improve accuracy in detecting heart diseases.

Speech Recognition

- Developed a speech recognition system using deep learning models to accurately transcribe spoken language into text.

Chest X-Ray Images (Pneumonia)

- Developed a deep learning model to analyze chest X-ray images for pneumonia detection.

Language Detection

- Created a language detection system using natural language processing (NLP) techniques and machine learning models.

Airline Passenger Satisfaction

- Developed a machine learning model to predict passenger satisfaction based on flight service and customer feedback.

Amazon Reviews

- Conducted analysis of Amazon reviews using sequence models in natural language processing (NLP) to extract insights and sentiment from customer feedback.

Customer Segmentation

- Implemented unsupervised learning to segment customers by demographic and behavioral data, enhancing targeted marketing and personalized experiences.

AWARDS

Kaggle Master

- Acknowledged for outstanding achievement and contributions on Kaggle, demonstrating expertise in data science with a strong focus on deep learning challenges.

CERTIFICATES

- | | | |
|--|---|-----------------------------------|
| • Machine Learning | • Applied Deep Learning | • Deep Neural Networks Foundation |
| • Neural Networks and Deep Learning | • Neural Networks Foundation | • Python Programming Master |
| • Natural Language Processing Foundation | • Python for Data Science, AI & Development | • Exploratory Data Analysis |
